ADVANCEMENTS IN CARE OF THE CV PATIENT: MULTIDISCIPLINARY STRATEGIES FOR OPTIMAL RESULTS

**Join us for an exciting opportunity to earn CME/CE* credit,
network with local peers, and enjoy a full day of great education.**

Registration includes accreditation, breakfast, lunch, and outstanding education presented by 10+ experts in the field of cardiovascular medicine.

**Visit the accreditation page for details.*

Educational Highlights

New Technologies and Therapies for Diagnosing and Treating:

- Peripheral Vascular Disease
- Structural Heart Disease
- Coronary Artery Disease and Heart Failure
- Rhythm Management

Learning Objectives

Upon completion of this program, participants should be able to:

- Recognize key clinical features of arterial and venous disease and know the appropriate first steps in diagnosis and management. There will be a special emphasis on wound and limb ischemia.
- Recognize key clinical features and treatments of coronary heart disease and acute coronary syndrome.
- Understand the concept of the "heart team" and its implications in treating patients with the latest technology with a multidisciplinary approach.
- Review latest guidelines as they pertain to transcatheter heart valve treatments.
- Revisit the latest guidelines as they pertain to preventive medicine.

Program Hours

Saturday, August 13, 2016
7:30 am - 5:00 pm
